

Solution Brief

Enterprise Augmented Reality Visual Support

Remote Support Challenge

Organizations today need new ways to enhance their remote work and support capabilities while still being productive, effective, and now safe. Service delays create frustration when remote agents or field technicians are challenged with skills gaps, lack of necessary tools, or encounter unforeseen situations in order to resolve issues on a timely basis. Service teams try to assess, diagnose, and resolve incidents remotely with limited situational analysis or context. This results in a poor customer experience, negatively impacting resolution times, operating cost, uptime, resource productivity, and customer loyalty.

Enterprises have made significant advances to address some of these challenges. However, today's consumer apps are not very effective for solving complicated problems. Additionally, enterprises require solutions that can scale, collaborate, and are part of an integrated service workflow.

CareAR™ Solution

CareAR™ is an augmented reality visual support platform that helps organizations digitally transform their support experience with game-changing AR capabilities. CareAR enables teams to extend augmented reality as part of a seamless user experience with customer service management, field service management, and IT service management.

CareAR enables service management teams anywhere, to provide real-time visual AR assistance, guidance, and compliance for their on-site customers, field workers, and employees. Remote agents and experts are able to virtually see the situation and visually guide customers and field workers intuitively using a suite of augmented reality tools via desktop, mobile, or smart glass devices, as if they were there in person.

Additionally, CareAR's end-to-end integration allows fulfillers to instantly capture content of images and recordings during the service session. The content is automatically saved in the CareAR secure cloud, enhancing knowledge transfer and ensuring proof of work completion or compliance.

Use Cases

Field Services

See what your customers, employees, and field workers see.

Customer Service

Enhance the customer experience with visual engagement.

IT Service Management

Visual trouble shooting for real time resolutions across enterprise IT.

Results

CareAR Assist provides a visual AR solution addressing common support use cases such as remote trouble shooting or smart hands for “See What I See”. If being on-site is needed, then having the ability to “Show Before You Go” in order to see what your customers or field workers see, prior to being dispatched, ensures greater success of fixing the problem the first time. Fulfillers can now gain valuable visual and situational context, along with the digital tools they need, to focus more of their time on solving the actual problem versus assessing the situation. Centralized NOC teams, can utilize L3 resources to provide remote assistance and guidance to broader L1 field teams realizing significant efficiencies. CareAR for Assist delivers these KPI's while allowing the ability to work remotely and safely.

How it Works

SEE

Virtually see as if the situation were actually there

SOLVE

Visually guide and collaborate for effective problem resolution

SAVE

Capture and share content in systems and with teams

Features

- Real-time HD video and audio collaboration
- Enterprise grade AR toolset
- 3D spatial mapping
- Auto Content Capture
- Multi-device Support
- Robust dashboard and analytics

Technical Requirements

mobile	iOS 11 or later (includes ARKit) Android 10.0 or later (includes ARCore)
desktop	Windows and Mac
smart glasses	Android 8 or later (includes Google Glass, Realware, Vuzix)
network	500 kbps and higher N/A for offline mode

Benefits

Faster Time to Resolution

Gain instant visual context - spend valuable time solving the actual problem versus assessing the situation.

Higher First Time Fix Rates

Provide step by step guidance using visual collaboration with AR annotation and 3D objects for more effective and accurate resolution.

Knowledge Transfer

Reduce your skills gap and make experts accessible to more junior field resources, contractors or customers.

Reduce Service Costs

With visual collaboration, decrease downtime of systems, eliminate need to send trucks, see what your agent, tech, or customer sees in real time.

Customer Experience

Elevate your customer's experience and NPS through unmatched quality, service, and capabilities with the highest human interactions.
